Hapi

GraphQL  
Node.js  
MongoDB  
npm

## Projects

---

### Kinex Connect Full Stack Web Project

- Created inventory management web application to display current inventory, alert low inventory and suggest production operations to improve workflow.
- Deployed website with user accounts and records of user changes.

### Ecommerce Site

- Designed a functional ecommerce site to sell unique art pieces.
- Implemented code to securely record credit cards and make safe currency transfers.

### Resume Site

- Constructed a single page website to present a person and their services to clients.

### Quad+Guard (Mechanical Engineering Senior Design Project)

- Led team of 6 classmates to design and build a quad-copter to assist in a water rescue.
- Created, divided and managed tasks for the project.
- Mediated team meeting and lead project presentations.
